

GHQ-WESTMINCOM WAN CONNECTIVITY

Personnel of Information Systems Group (ISG,CEISSAFP) headed by its Group Commander MAJ ROLEEN M DEL PRADO (SC) PA and SSg Gerardo A Pastor PA established the Wide Area Network link between WESTMINCOM and GHQ last 28 May 2008

GC, 5CEISG as host to GC, ISG and NMU Network Admin

The ISG team paid courtesy call to GC,5CEISG on 27 May 2008 and subsequently installed WAN equipment 2600 CISCO Router, E1 Modem (Adnet), Switch Hub and Fiber Optic (FO) D-Link Media Converter. They also conducted configuration of the WAN equipment.

They also demonstrated to 5CEISG personnel on how to connect an E1 link to a Router. On the same day of their task, Globe personnel also arrived at H56CEISG and conducted termination of E1 (G.703)-BNC Connector, reformatted and configured one (1) PC for Paperless/Intranet seminar. The Globe personnel also demonstrated to them on how to configure the PC.

On their second day, the team paid a courtesy call to CS, WESTMINCOM and conducted survey for the termination of E1 link at Hqs COC. They conducted connectivity test thru pinging of opposite end (GHQ) routers and servers. GHQ-5CEISG WAN link was successfully activated on the same day. After several successful tests of E1 link from
